Freeze Alert!

Helpful Tips:

- * Due to the extreme cold weather that has been forecast, please remove garden hoses from the outside faucets. The extended freezing temperatures will freeze the water in the wall and cause leaks.
- * Carry some emergency items in your car - flares, blanket, candle, matches, tire chains and a small folding shovel.
- * Never throw hot water on a frosty windshield; it might crack the glass. Use a scraper or start your car early and let the defroster do the job.
- * Do not use the cruise control when there is ice on the road. If the cruise accelerates on ice, you may lose control of the car.
