Dear Homeowners,

It's summertime again so hang in there!

- Air conditioning systems are running 24/7...change filters once a month or even better twice!
- If you have a swimming pool, maintain it daily.
- Use a "power hose" to clean the outside air conditioning condensing unit.
- Service is offered Monday through Friday only. If you need service on the weekends or holidays, overtime is not covered. Nations Home Warranty will pay for the parts, but- if you need service it will be your responsibility to pay the overtime cost for the technician. Sorry!
- When you renew, be sure to check out the PREMIER Package if you have not purchased it already. When air conditioning or heater replacement is necessary, it will save you lots of money (code violations, permits, refrigerant recovery and disposal, removal of defective equipment plus additional coverage on the dishwasher, air conditioning, built-in-microwave, plumbing, range/oven/cook top and trash compactor). If you have a monthly contract, call today, and add the PREMIER Package.
